

## **ISSUES AND PROBLEMS OF ELEMENTARY EDUCATION IN GORAKHPUR REGION OF UTTAR PRADESH**

**Dr. DILEEP KUMAR MAURYA \***

### **ABSTRACT**

The current paper endeavors to consider the status and winning state of Elementary Education in Gorakhpur region in India. Illustrative Survey was utilized as the procedure of the examination. In the investigation, 10 grade school of which 5 each from private and government were chosen through arbitrary inspecting procedure. An independent survey was utilized as the instrument of the examination with Mean rate as the measurable method in order to gather, break down the information. From the investigation, it came to draw that Elementary Education is the start of training. Despite the fact that there were numerous Government grade schools it was not excessively evolved and appropriately kept up. Numerous deformities existed as contrast with tuition based schools. Along these lines, it is the ideal time for the administration to show genuine drive for the turn of events and legitimate working of Elementary Education in the locale just as in the State in general.

### **INTRODUCTION**

Training is one of the essential needs of individuals and where there is instruction, there is human progress. It is a procedure of human edification and strengthening for the accomplishment of ever more elevated personal satisfaction. The government assistance and progress of a country relies upon the nature of instruction prevailing in the nation. In a law based set up, the job of education turns out to be especially significant since popular government can work successfully just if there is a functioning investment by the individuals and this cooperation comes just through education. Then again, essential instruction is the foundation of instructive example of a nation. Any arrangement of training can never be fruitful inasmuch as it has sound essential instruction framework, essential training

established the profound framework of the uncommon plan for the advancement of the kid commensurate with his developing age. It is a strong factor for the advancement of a kid's character. At this stage, the youngster begins connecting with his condition that assisted with accomplishing and accomplish better and more excellent life in his future Endeavour. From this view, our national heads have consistently been putting forth steady attempts for mass instruction in our nation. The Education Commission (1964-66) deliberately brought up that, "predetermination of India is being partaken in her study hall." According to Article 45 of Indian Constitution, the state would take a stab at free and necessary essential training up to the age of 14 years for all kids.

Essential training assumes a critical job in the advancement of a nation. It is fundamental to give in any event least loan of training to all the individuals. Be that as it may, the education percent-age is exceptionally low in India at present. For giving at any rate least degree of training in Article 45 had given to all youngsters up to the basic level. The acknowledgment of this genius diction had, become important for creating nations taking into account the colossal innovative improvement of the world. Be that as it may, inspite of the different endeavors, the constitutional mandates couldn't be satisfied till now in light of numerous issues. In various nations, essential training is called Elementary Education or Fundamental Education. In India, we utilize three terms for it for example Essential training, Elementary education and essential instruction. With the disappointment of Basic education, it is currently called generally essential instruction. As per our constitution the essential instruction is to be given in the school for example of 8 (eight) years length for the age gathering of kids 6-14 years. In certain states, the upper essential is additionally called center school training. Essential training assumes a significant job in the socialization of a youngster as well as in his physical and mental development. It is certain that essential training is the foundation of instructive example of a nation. Any arrangement of instruction can never be fruitful in so far as in the event that it doesn't have a sound and smooth essential training framework. Essential instruction lays the profound foundation of the training arrangement of a nation. Yet at the same time the objective of universalization of essential training has consistently remained un-came to and unachieved. As the elementary schools are still facing numerous issues, for example, wastage and stagnation, issues of non-enrolment, absence of physical and HR, absence of able educators, issues of association and administration, issues of foundation and so on. There is consistently a variance in

development, the executives, method of instructing, administration contrast with slopes and the valley. Till today, slope zones are confronting numerous issues with respect to training. On the off chance that the instruction framework is constant like this, at that point the states will never develop ration and it will take one more century to arrive at the longing level.

## **SELECTION OF THE PROBLEM**

Issues of Elementary Education in Gorakhpur District of Uttar Pradesh, India

## **OBJECTIVES OF THE STUDY**

1. To study the issues looked by the understudies in Primary schools.
2. To study the issues looked by the educators in Primary schools.
3. To study the lack of the important foundation of the chose elementary schools.
4. To study the absence of prepared instructors in grade schools.

## **HYPOTHESES OF THE STUDY**

1. There exists the issues looked by the understudies in elementary schools.
2. There exists the issues looked by the instructors in elementary schools.
3. There exists the deficiency of the essential foundation in the chose grade schools.
4. There is an absence of prepared educators in grade schools.

## **METHODOLOGY**

For the current examination, descriptive survey overview technique is utilized.

## **SAMPLE**

In the current investigation, 10 grade schools with 5 each from the private and government is chosen through a random sampling procedure.

**TOOLS**

For this investigation, a self-made questionnaire is utilized as the tool giving weightage of '1' for 'Yes' and '0' for 'No' respectively.

**STATISTICAL TECHNIQUE**

Mean Percentage is utilized as a statistical technique so as to look at, dissect all the pertinent information.

**ANALYSIS AND INTERPRETATION**

**Table 1. Problems Related to the Students**

SL. NO.	PROBLEM	YES (%)	NO (%)
1.	Is there library office in your School?	49	51
2.	Do you get water flexibly in the School compound?	51	49
3.	Does the school give transport office to the understudies?	0	100
4.	Does the school give PC Class?	0	100
5.	Are the study halls of the school legitimate lit and very much ventilated?	21	79
6.	Does your school have legitimate Play area?	89	11
7.	Do the educators are going to class	100	0
	Total	44.28	55.71

Shows the different issues looked by the understudies in various elementary schools. As indicated by the supposition gathered from 10 grade schools, all the understudies confronted distinctive problems like library issue, water issue and appropriate light and ventilated issue.

Be that as it may, all the grade schools confronted normal issue in transport and PC offices which are not given by the schools. Along these lines, the speculation is acknowledged.

**Table 2. Issues Related to the Teachers**

SL. NO.	PROBLEM	YES (%)	NO (%)
1.	Do the educators embrace exercise plan?	89	11
2.	Do educators give schoolwork or task routinely to the Understudies?	81	19
3.	Are the educators ready to cover their Prospectus in time?	79	21
4.	Do you face the issue of Lack of educators?	100	0
5.	Do the understudies co-work with their educators while learning their Exercises?	100	0
6.	Are the educators going to class normally?	100	0
7.	Is there acceptable relationship among the educators, staff, understudies and head/superintendent?	100	0
8.	Do educators and non-instructing staffs get compensation consistently?	50	50
9.	Does your school direct staff meeting?	100	0
10.	Are the guardians fulfilled in the encouraging procedure given by the school?	100	0
	Total	90	10

Shows, the different issues looked by the instructors in elementary schools. As per the information assortment, generally the instructors experience the ill effects of pay

issue, a few educators can't give customary task and can't complete prospectus in time. Along these lines, the theory is acknowledged

**Table 3. Problems Related to Infrastructure**

SL. NO.	PROBLEM	YES (%)	NO (%)
1.	Does the school direct co- educational plan exercises?	100	0
2.	Does the school give clinical registration offices to the school?	21	79
3.	Is the clean office given by your school acceptable?	49	51
4.	Does the school give separate latrine office to the two instructors and understudies?	100	0
5.	Do you get monetary assistance from the focal and state government?	51	49
6.	Does your assessor of your school visit your school consistently?	100	0
7.	Does the region where your school has built up been a neighborly condition?	100	0
8.	Are the study halls of the school adequate for the understudies?	100	0
9.	Are nearby individuals engaged with your school the board?	100	0
10.	Do groups and strike influence the scholarly climate of your school?	100	0
	Total	82	18

Table-3 shows with respect to the framework issues looked by the schools, for example, clinical registration offices, clean facilities, absence of money related assistance from the

administration and so forth. For the foundation offices all the schools are getting a charge out of to the desire capable level. In this way, the speculation is dismissed.

**Table 4. Number of Trained and Untrained Teachers**

SL. NO.	School's Name	Trained Teacher's	Untrained Teacher's	TOTAL
1.	S.P. Children's Academy	01	14	15
2.	Wisdom World School	03	13	16
3.	Little Flower School Primary Block	02	08	10
4.	Bela Public School	03	07	10
5.	St. J.R.P. Public School	0	16	16
6.	Astha Public School	04	13	17
7.	Primary School Rampur	02	16	18
8.	Prathamik Vidyalaya Jungle Tulsiram	01	05	06
9.	V.K. Children Academy	0	07	07
10.	Rotary Club Primary School	03	10	13
	Total	19	109	<b>128</b>

Table-4 shows the all out number of educators working in 10 schools is 128 of which 19 are prepared and 109 are undeveloped instructors separately. It shows that number of undeveloped educators is more than the prepared instructors. It implies that the majority of the schools have more undeveloped instructor than the prepared educators. In this way, the theory is acknowledged.

## CONCLUSION

Basic training is the establishment of the proper arrangement of instruction. In the event that a kid has an appropriate or profound established foundation, at that point, half work of a kid is finished. It is the start of instruction. Indeed, even the constitution of India give this privilege and Article 45 was embedded which guarantee free and obligatory education till the youngsters complete 14 years old. Every single kid has the option to get instruction. In Uttar Pradesh, elementary schools were massively expanded for the 2-3 decades yet so it doesn't arrive at the ideal level. At present, there are numerous private and government elementary schools. Despite the fact that there are numerous administration elementary schools in the Gorakhpur locale, it isn't so evolved and appropriately kept up. There is numerous imperfections contrast with non-public schools. That is the reason guardians liked to send their wards to non-public schools than government schools inspite of the cost. In the event that the administration schools are not appropriately kept up and develop ration, at that point numerous helpless youngsters won't get legitimate instruction as their folks can't bear the cost of tuition based school. In the event that there is no appropriate training for every single kid, at that point there would be no advancement in the general public just as in the State. That is the reason government must step up to the plate ventures for the turn of events

and legitimate working of basic instruction in Gorakhpur locale of Uttar Pradesh.

## SUGGESTIONS FOR IMPROVEMENT

1. In order to have a smooth working of the grade schools, compensations must be paid on schedule.
2. Adult proficiency program ought to be given towards their folks by methods for radio, T.V., casual conversation, seminar and so forth.
3. As game and game is additionally a piece of co-curricular exercises in the field of instruction, the school must empower and give an adequate material with the goal that the understudies will get all round advancement in the educating inclining process.
4. Most of the school confronted absence of prepared instructors. So as to improve the encouraging expertise of the educators and the legislature ought to sort out workshop or momentary course for the instructors.
5. For the improvement of framework of elementary schools, the administration needs to contribute more or pay more attention towards the grade schools.
6. In order to have adequate instructors in elementary schools, the legislature must enlist progressively qualified educators.
7. For the viable and worth training, instruction framework ought to be made free zone.
8. In order to have quality training in the State, educational plan ought to be made so that stooges should show more drive part.
9. The school must give a modest vehicle office so it would be increasingly helpful for the understudies to go for school
